 - **Hematologic/Lymphatic:** No easy bruising, no lymphadenopathy
 - **Allergic/Immunologic:** No new allergies
-

Plan:

1. **Chronic Fatigue and Headache Evaluation:**
 - Check for anemia, thyroid function, and sleep disorders
 - Consider referral to a neurologist for headache management
2. **Anxiety Management:**
 - Continue current medication (Escitalopram 10 mg daily)
 - Regular follow-ups with mental health professional
 - Consider increasing frequency of CBT sessions
3. **IBS Management:**
 - Review and adjust dietary plan
 - Consider probiotics and fiber supplements
4. **Lifestyle Modifications:**

- Encourage maintaining regular yoga and walking routine
- Discuss potential benefits of mindfulness and stress reduction techniques

5. Routine Health Maintenance:

- Annual flu shot
- Regular dental and vision check-ups
- Update vaccinations as needed

6. Follow-Up Appointments:

- Schedule follow-up in 3 months to reassess symptoms and review test results
